THEY'RE BACK - MILES REDD & DAVID KAIHOI FOR SCHUMACHER

NEW Miles Redd + David Kaihoi collection of fabrics, wallcovering and trim launch for Schumacher. The design partnership of Redd Kaihoi combines the bold fantastical world of Miles Redd with the restrained artistic vision of David Kaihoi. Together, they create drama-filled rooms that thrill. Each has created separate collections for Schumacher, and like their design partnership, one complements the other.

Miles Redd: "It is so nice to be able to bring things that you love to the world at large."

18 designs. Known for his eye-catching colour and his playful mélange of high and low, Miles Redd has a singular style that stands out. Invigorated by a modernity that's rooted in classic decorating, his interiors are bold, inventive, and highly polished. Countless inspirations fuel Redd's designs, from the crisp American style of Albert Hadley and Billy Baldwin to the layered fantasy of Oscar de la Renta and Stéphane Boudin. Central to his ethos is the concept that ideas are simply a juxtaposition of existing concepts reimagined in novel and thrilling ways. His second collection for Schumacher is one such thrill: full of dramatic patterns, inventive fabrics and beautiful finishes that channel his signature look.

David Kaihoi: "I see the collections as a reflection of the rooms we create: a wide-ranging mix of classical and modern motifs, objects, art and materials that we both love."

14 designs. Blending a fierce downtown sensibility with a refined uptown taste for fabrics and wall-coverings, David Kaihoi creates singular designs that take any space to new heights. An artist to his core, Kaihoi believes authenticity is everything and draws much of his inspiration from the process of physically creating things: painting, sculpting, constructing, decorating, designing, daydreaming. The patterns in this collection range from soft and painterly to bold and graphic and move from Japan to Africa to the American Southwest. His influences are wide and varied, and the results are always unique.
